

Learner Feedback Questions #305

- Which of the following statements about Internet communication among patients is true?
 - For older patients, use of the Internet for health information is still minimal.
 - Most patients use the Internet as a secondary source.
 - About 80 percent of American adults have used the Internet for health information.
 - Most patients don't trust the Internet information.
- Experts believe the "e-patient" is a result of the managed care model's top priority, which is:
 - access to care
 - increasing bed capacity
 - limiting care to a primary physician
 - prompting patients to accept responsibility for own healthcare consequences
- The nurse's extended role in working with "e-patients" should be as:
 - educator
 - guide to the best sources
 - producer of quality resources
 - critic of resources
- What is one of the two main reasons patients are excluded from Internet healthcare information?
 - age
 - physician criticism of information
 - distrust of information
 - social isolation
- What is the "e-patient" primarily looking for on the Internet?
 - responses from sources they consider "best"
 - information that is short and concise
 - the most current information
 - positive outcomes related to their healthcare concerns
- The nurse's role when patients access online support groups is to:
 - discourage their use as unsubstantiated information
 - correct any misinformation patients are given
 - encourage their use to connect with others who have similar problems
 - educate patients there are many "quacks" on these sites
- Nurses can help patients who use the Internet as a major source for healthcare information by:
 - discouraging its use before talking to clinician
 - compiling a list of reliable sites
 - advising them to not consult social networking sites
 - advising them most sites are sponsored by vendors seeking profit
- When a patient has demands about his treatment plan related to information received online, the nurse needs to:
 - tell the patient the clinician is in charge of the treatment plan
 - set boundaries for each patient and situation
 - advise the patient that online sources often contain misinformation
 - ask the patient which source he consulted
- Which of the following sources would help a patient select an oncologist?
 - WebMD
 - MedlinePlus
 - National Cancer Institute
 - National Board of Medical Examiners
- The source for medication alerts and information on drug interactions is:
 - National Institutes of Health
 - Institute for Safe Medication Practices
 - Agency for Healthcare Research and Quality
 - MedlinePlus
