

Learner Feedback Questions #325

- Which of the following statements is a condition that must be met for a pandemic to occur, according to the WHO?
 - The mortality rate of the infectious disease must increase by 10 percent in five areas of the world.
 - The health systems on at least two continents cannot meet the demands of the disease.
 - There is distribution of the disease across all age groups.
 - The virus can easily be spread from person to person.
- In the immediate post-peak phase of a pandemic:
 - the evaluation of the plan should be the top priority in agencies or populations
 - the surveillance needs to be maintained in case of another wave of the infection
 - the goal is to encourage the recovered to return to previous activity as soon as possible
 - the mortality and morbidity statistics should be compiled quickly
- Which two agencies are responsible for developing the annual flu vaccine?
 - CDC and FDA
 - WHO and CDC
 - WHO and FDA
 - IOM and CDC
- In the WHO Global Alert and Response Preparedness Plan, in phase IV:
 - human-to-human transmission is occurring
 - the virus is spreading to at least two countries in the WHO region
 - planning and capacity development are still being developed
 - the pandemic continues to spread
- Which of the following is NOT a function of the CDC in a pandemic?
 - provides scientific guidelines to local health departments
 - provides lab testing and develops new laboratory methods it shares with the states and communities
 - manages strategic stockpiles of medications and supplies
 - develops vaccines
- What is a major reason believed to have contributed to the quick response to H1N1?
 - The CDC stockpiles of meds were disseminated quickly.
 - Public health departments were incorporated into national emergency response run by the Department of Homeland Security.
 - The FDA was familiar with the H1N1 vaccine.
 - Similarity of state plans resulted in a quicker response time.
- Which of the following statements about avian flu (H5N1) is NOT true?
 - The third parameter for a pandemic has not been met.
 - A vaccine is available if H5N1 becomes a pandemic.
 - Prevention of an H5N1 pandemic is seen as an economic success.
 - The WHO has been tracking H5N1 for 5 years.
- HIV/AIDS in several of the African countries is an example of:
 - endemic
 - epidemic
 - pandemic
 - pre-pandemic
- Good hand hygiene requires individuals to wash their hands:
 - 45-60 seconds
 - 15-20 seconds
 - with alcohol-based gel regularly
 - after you eat
- Which of the following activities at the state and local levels of government have been credited with improving surveillance for potential pandemics in recent years?
 - local health departments mandating hospital closures when necessary
 - mandatory requirement that states report flu cases each week, year-round
 - hiring more public health nurses in communities with high incidence of yearly flu
 - frequent reminders of high-risk individuals to receive their annual flu vaccine

Evaluation

- I can identify the difference between an epidemic and pandemic.
 - strongly agree
 - agree
 - neutral
 - disagree
 - strongly disagree
- I can describe and discuss the agencies involved in a pandemic response.
 - strongly agree
 - agree
 - neutral
 - disagree
 - strongly disagree
- I can list three actions an individual can take as part of a pandemic response.
 - strongly agree
 - agree
 - neutral
 - disagree
 - strongly disagree
- The objectives relate to the overall goal of the article.
 - strongly agree
 - agree
 - neutral
 - disagree
 - strongly disagree
- The article is well-written and logically organized, and defines terms adequately.
 - strongly agree
 - agree
 - neutral
 - disagree
 - strongly disagree
