

Learner Feedback Questions #332

- When assessing documentation practices, a good place to start is:
 - state nurse practice act
 - nursing process
 - Joint Commission policies on documentation
 - Press Ganey standards for documentation
- The collaborative approach to clinical documentation includes:
 - professional members of the interdisciplinary team
 - members of the treatment team, excluding physicians
 - licensed nurses and certified nurse aides
 - case managers documenting the team treatment plan
- Which of the following may be documented as many as four times in the medical record?
 - vital signs
 - medications
 - progress notes
 - intake and output
- Charting by exception:
 - should never be used in acute care facilities
 - is frequently used in nursing homes
 - is more accurate since it focuses only on the exception
 - tends to eliminate over- or under-charting
- The most common problem with EMR systems addressed by healthcare providers is:
 - potential for errors by users is too high
 - length of time to train users is too long
 - opportunity for HIPAA violations is high
 - product lacks capability to be completely customized to a specific organization
- The EMR is a computerized:
 - legal record that requires authentication
 - system that eliminates errors of omission
 - record that disallows blank data-entry fields
 - system designed to eliminate narrative data
- When nursing home residents are transferred from an acute care hospital, a frequent problem with EMR documentation is:
 - incomplete documentation of MAR
 - missing case manager summaries
 - physician progress notes are missing
 - skin-assessment data missing
- Which of the following statements about EMR retention is true?
 - Technology has advanced to be able to retrieve electronic records post disasters.
 - Falsification of errors is virtually impossible with the EMR.
 - After an EMR has been functioning effectively for 5 years, hard copies of records can be deleted.
 - When a standard of care changes, most EMRs can update these changes quickly.
- Healthcare systems typically implement the EMR:
 - as a pilot on one unit
 - in stages on all units
 - after all personnel are trained
 - first involving employees with the highest computer literacy
- A frequent problem that occurs when an EMR is being implemented is:
 - staffing plans don't include EMR training
 - there may be lapses in documentation since both the paper and EMR are in use
 - slow learners may not receive the extra instruction they need
 - the security is broken during the transition from paper to EMR

Evaluation

- I can recognize the pros and cons of differing documentation strategies in use in healthcare.
 - strongly agree
 - agree
 - neutral
 - disagree
 - strongly disagree
- I can discuss how to use the electronic medical record as a documentation methodology for support of standard of care.
 - strongly agree
 - agree
 - neutral
 - disagree
 - strongly disagree
- I can review my professional documentation and make changes to enhance its effectiveness.
 - strongly agree
 - agree
 - neutral
 - disagree
 - strongly disagree
- The objectives relate to the overall goal of the article.
 - strongly agree
 - agree
 - neutral
 - disagree
 - strongly disagree
- The article is well-written and logically organized, and defines terms adequately.
 - strongly agree
 - agree
 - neutral
 - disagree
 - strongly disagree
