

Learner Feedback Questions #339

- Which of the following is NOT a primary goal of patient rounding?
 - decreases call-bell usage
 - improves patient safety
 - improves patient satisfaction
 - serves as data for nurses' performance review
- Current research about rounding says the practice is most effective when done:
 - hourly during days and evenings; every 2 hours on night shift
 - every 2 hours, around the clock, including nights
 - before change of shift
 - hourly around the clock, including night shift
- According to the Woodward study, when a California hospital implemented a rounding model, the Press Ganey results were in which percentage of the national reporting data?
 - top 1 percent
 - top 10 percent
 - top 20 percent
 - top 25 percent
- According to Meade, et al., patients' perceptions of quality care include which of the following?
 - having a bath every day and clean linen
 - having their call lights answered within 5 minutes
 - having their physical needs met
 - knowing the names of the nurses caring for them
- When rounding is implemented, patients use the call-bell light:
 - mostly for safety and care issues
 - excessively for insignificant reasons, as they always did
 - mostly during the evening and night shifts when there are fewer nurses
 - when they have complaints
- The biggest barrier to implementing a rounding model is all of the following EXCEPT:
 - educating large number of nurses
 - getting staff buy-in
 - acuity level
 - additional cost of hiring more nurses
- The universal question asked before the unit "rounder" leaves a patient's room is:
 - Are you comfortable?
 - Do you need anything else while I am here?
 - Is there anything you want me to tell your doctor?
 - Are you satisfied with the care you are receiving?
- According to Meade, et al., for a rounding program to be successful, which member of leadership/nursing team is most instrumental in getting buy-in?
 - director of nursing
 - nurse manager
 - clinical specialist
 - staff nurse
- According to Orr, et al., the best way to implement a rounding program is:
 - pilot program on one unit
 - all units at the same time
 - according to hospital/nursing unit culture
 - a specialty unit where there is less patient diversity, according to diagnosis
- Besides falls, research shows which of the following is reduced with patient rounds:
 - pressure ulcers
 - medication errors
 - confusion
 - anxiety

Evaluation

- I can summarize how hourly rounding benefits patients, staff and the facility.
 - strongly agree
 - agree
 - neutral
 - disagree
 - strongly disagree
- I can describe different components and elements to hourly rounding programs.
 - strongly agree
 - agree
 - neutral
 - disagree
 - strongly disagree
- I can identify the barriers and difficulties of initiating an hourly rounding program.
 - strongly agree
 - agree
