

- The stages of chronic kidney disease (CKD) are determined by the:
  - creatinine level
  - renal biopsy
  - glomerular filtration rate
  - BUN
- The prevent CKD, functioning nephrons can compensate for the damaged nephrons up to:
  - 30 percent
  - 40 percent
  - 60 percent
  - 80 percent
- The preferred vascular access for hemodialysis is:
  - arterio-venous fistula
  - arterio-venous graft
  - large-bore catheter into the femoral artery
  - large-bore catheter into the subclavian vein
- The most frequent complication with peritoneal dialysis is:
  - hypovolemia
  - peritonitis
  - hypertension
  - hypokalemia
- The main reason hemodialysis patients have fewer side effects related to treatment now than in previous decades is:
  - patients are started on dialysis earlier than in the past
  - modern hemodialysis equipment allows the precise removal of fluid hourly
  - patients are screened better and those with severe comorbidities are managed medically
  - today's nurses have more education in nephrology and dialysis
- Which of the following patients would most likely be placed on CRRT?
  - a trauma patient in acute renal failure with a BP of 85/42 mm Hg
  - a patient on peritoneal dialysis with a potassium of 6.5 meq/L
  - a patient on hemodialysis with a BP of 142/88 mm Hg
  - a renal transplant patient with a BUN of 23 mg/dL
- The value to the patient for choosing automatic peritoneal dialysis with a cyclor is:
  - cost
  - less complications
  - convenience
  - precise control
- Renal transplantation is an option for:
  - patients who have failed dialysis
  - all end-stage renal patients today
  - patients who have been evaluated and deemed medically stable for transplantation
  - patients who are younger than 75
- Conservative management of CKD includes dietary management of:
  - protein
  - vitamins C
  - carbohydrates
  - vitamins A

- According to the 2010 National Kidney Foundation's report, two-thirds of all CKD cases are a result of hypertension or:
  - trauma
  - diabetes mellitus
  - cardiac arrhythmias
  - infectious diseases

## Evaluation

- I can describe the pathophysiology of CKD.
  - strongly agree
  - agree
  - neutral
  - disagree
  - strongly disagree
- I can discuss the clinical manifestations of CKD.
  - strongly agree
  - agree
  - neutral
  - disagree
  - strongly disagree
- I can describe dialytic treatment modalities for CKD.
  - strongly agree
  - agree
  - neutral
  - disagree
  - strongly disagree
- I can discuss nursing care and interventions for the patient with CKD.
  - strongly agree
  - agree
  - neutral
  - disagree
  - strongly disagree
- The objectives relate to the overall goal of the article.
  - strongly agree
  - agree
  - neutral
  - disagree
  - strongly disagree
- The article is well-written and logically organized, and defines terms adequately.
  - strongly agree
  - agree
  - neutral
  - disagree
  - strongly disagree
