

- What is the most common type of colorectal cancer?
  - squamous cell
  - mucinous or colloid
  - adenocarcinoma
  - signet ring cell carcinoma
- The incidence of colorectal cancer is highest in which race and gender?
  - white men
  - black men
  - Hispanic women
  - American Indian or Alaskan women
- Risk stratification for colorectal cancer begins with which of the following?
  - complete physical examination and history
  - immediate colonoscopy
  - at the age of 45
  - referral to a gastroenterology specialist
- Patients can be stratified into three risk groups. Which of the following is NOT a risk group?
  - average risk
  - increased risk
  - high risk
  - zero risk
- Which of the following is NOT considered a risk for colorectal cancer?
  - history of ulcerative colitis
  - history of Crohn's disease
  - history of mitral valve prolapse
  - family history of colorectal cancer
- Which of the following statements is true?
  - patients with a family history of FAP or HNPCC are at high risk for colorectal cancer
  - patients with a known genetic history of colorectal conditions are not at risk if the disease occurred on their father's side of the family
  - patients are only at risk if they are older than 50
  - disease should be assessed only if a change in bowel habits occurs
- Patients at increased risk for colorectal cancer should:
  - not worry about screening until age 50
  - should begin screening colonoscopy by age 40
  - only use FOBT for screening
  - take an aspirin daily to decrease risk
- This method of screening assesses for 21 markers in a stool sample:
  - FOBT
  - immunochemical fecal testing
  - DNA fecal testing
  - CT colonography
- Approaches to colorectal cancer prevention include all of the following EXCEPT?
  - lifestyle modification
  - early detection and screening
  - chemoprevention
  - yearly blood work and screening

- Patients should be referred to specialists for which of the following?
  - positive FOBT
  - unexplained weight loss
  - iron deficiency anemia
  - all of the above

## Evaluation

- I can identify the most common type of colorectal cancer.
  - strongly agree
  - agree
  - neutral
  - disagree
  - strongly disagree
- I can state the ethnic groups at highest risk for colorectal cancer, as well as incidence by gender.
  - strongly agree
  - agree
  - neutral
  - disagree
  - strongly disagree
- I can explain how to stratify patients into risk categories.
  - strongly agree
  - agree
  - neutral
  - disagree
  - strongly disagree
- I can discuss types of screening methods, prevention and when to refer patients to a specialist.
  - strongly agree
  - agree
  - neutral
  - disagree
  - strongly disagree
- The objectives relate to the overall goal of the article.
  - strongly agree
  - agree
  - neutral
  - disagree
  - strongly disagree
- The article is well-written and logically organized, and defines terms adequately.
  - strongly agree
  - agree
  - neutral
  - disagree
  - strongly disagree
