THE LEARNING SCOPE ▶ CE Offering • 2 Contact Hours

1. The CDC estimates what percentage of people infected with HIV are unaware of their condition?  
   a. less than 1 percent  
   b. 5 percent  
   c. approximately 20 percent  
   d. about 30 percent

2. Which of the following groups account for more than half of all people living with HIV worldwide?  
   a. homosexual men  
   b. women and girls  
   c. drug abusers  
   d. adolescents

3. Which part of the world accounts for the highest number of people infected with HIV?  
   a. Europe  
   b. Asia  
   c. North America  
   d. sub-Saharan Africa

4. Approximately how many new cases of HIV occur each year in the U.S.?  
   a. 10,000  
   b. 50,000  
   c. 100,000  
   d. 150,000

5. Which of the following states is not among those with the highest incidence of AIDS?  
   a. New York  
   b. California  
   c. Florida  
   d. Ohio

6. The CDC predicts by 2015 which of the following groups to represent 50 percent of all patients living with HIV?  
   a. people older than 50 years old  
   b. young adults  
   c. women  
   d. homosexual men

7. In the older patient, all of the following statements are true regarding HIV infection EXCEPT:  
   a. They may not recognize that they have the same risk factors as younger people.  
   b. They may be sexually active but do not practice safer sex.  
   c. Women can have increased risk of HIV infection due to age-related changes to the vagina.  
   d. 20 percent of all patients living with HIV will be over age 50.

8. Which statement is true regarding the 2012 Panel on Antiretroviral Guidelines for Adults and Adolescents recommendations for HIV-infected patients?  
   a. Only patients at risk for developing AIDS should receive antiretroviral medication.  
   b. Only patients engaged in high-risk sexual practices should receive antiretroviral medications.  
   c. Patients newly diagnosed with AIDS should receive antiretroviral medications.  
   d. All HIV-infected individuals should receive antiretroviral medications.

9. The first action that a healthcare worker should perform following an occupational exposure to HIV is:  
   a. wash the exposed area with soap and water thoroughly  
   b. wash the area with betadine  
   c. report the incident to the supervisor  
   d. receive an HIV test

10. Which statement is NOT true regarding HIV/AIDS in Florida:  
    a. Florida ranks third in the nation for AIDS cases.  
    b. The greatest numbers of AIDS cases were reported in Broward and Miami-Dade counties.  
    c. Black men and, to an even greater extent, black women are over-represented in the HIV epidemic.  
    d. Hispanic male and females rates of HIV/AIDS are lower than their white counterparts.

Evaluation

1. I can discuss the epidemiology of HIV/AIDS at the international, national and state level.  
   a. strongly agree  
   b. agree  
   c. neutral  
   d. disagree  
   e. strongly disagree

2. I can describe HIV-infected patients in terms of age, gender, ethnicity and sexual orientation.  
   a. strongly agree  
   b. agree  
   c. neutral  
   d. disagree  
   e. strongly disagree

3. I can discuss the issues related to HIV testing and screening.  
   a. strongly agree  
   b. agree  
   c. neutral  
   d. disagree  
   e. strongly disagree

4. I can analyze the updates in the treatment of HIV patients.  
   a. strongly agree  
   b. agree  
   c. neutral  
   d. disagree  
   e. strongly disagree

5. I can identify risk factors associated with occupational exposure.  
   a. strongly agree  
   b. agree  
   c. neutral  
   d. disagree  
   e. strongly disagree

6. The objectives relate to the overall goal of the article.  
   a. strongly agree  
   b. agree  
   c. neutral  
   d. disagree  
   e. strongly disagree

7. The article is well-written and logically organized, and defines terms adequately.  
   a. strongly agree  
   b. agree  
   c. neutral  
   d. disagree  
   e. strongly disagree
