1. Survival of ovarian cancer directly correlates with which of the following factors?
   a. smoking status
   b. stage of disease at diagnosis
   c. family history of ovarian cancer
   d. CA-125 results

2. Which of the following is considered a risk factor for the development of ovarian cancer?
   a. history of breast feeding
   b. use of hormonal contraception
   c. total abdominal hysterectomy with bilateral oophorectomy
   d. family history

3. What are the current ovarian cancer screening recommendations for the general population?
   a. CA-125 annually
   b. Pap smear annually
   c. CT scan of the abdomen/pelvis
   d. there are no current screening guidelines

4. The symptoms of early ovarian cancer are generally vague; however, women most commonly describe which of the following?
   a. abdominal bloating and discomfort
   b. constipation
   c. ascites

5. What is the recommended treatment for patients with a hereditary risk for ovarian cancer?
   a. transvaginal ultrasound and CA-125 tumor marker starting at age 50
   b. prophylactic oophorectomy
   c. routine chest X-ray and CT scan of abdomen and pelvis
   d. no recommendations

6. What is/are the most common hereditary syndrome(s) found in ovarian cancer?
   a. Peutz-Jeghers syndrome
   b. familial adenomatous polyposis
   c. Lynch II and hereditary breast-ovarian cancer syndrome
   d. human epididymis protein 4

7. What diagnostic test is done to further work up suspected ovarian cancer?
   a. urinalysis
   b. pregnancy test
   c. CT scan of abdomen and pelvis
   d. CT scan of chest

8. The primary treatment for ovarian cancer is:
   a. surgical resection
   b. radiation therapy
   c. paracentesis
   d. chemotherapy

9. Which chemotherapy regimen is typically given to ovarian cancer patients?
   a. taxane and carboplatin
   b. taxane and gemcitabine
   c. carboplatin and adriamycin
   d. herceptin

10. What can nurses do to help improve the early detection of ovarian cancer?
    a. educate patients and the community on symptoms of ovarian cancer
    b. tell patients not to worry about vague abdominal symptoms
    c. realize there is no way to tell who is at high risk for development of ovarian cancer
    d. encourage patients to routinely have screening exams and tumor markers done

Evaluation

1. I can identify the risk factors for developing ovarian cancer.
   a. strongly agree
   b. agree
   c. neutral
   d. disagree
   e. strongly disagree

2. I can describe the cluster of symptoms associated with ovarian cancer.
   a. strongly agree
   b. agree
   c. neutral
   d. disagree
   e. strongly disagree

3. I can explain the current diagnostic and treatment recommendations for ovarian cancer.
   a. strongly agree
   b. agree
   c. neutral
   d. disagree
   e. strongly disagree

4. The objectives relate to the overall goal of the article.
   a. strongly agree
   b. agree
   c. neutral
   d. disagree
   e. strongly disagree

5. The article is well-written and logically organized, and defines terms adequately.
   a. strongly agree
   b. agree
   c. neutral
   d. disagree
   e. strongly disagree

How many minutes did you need to complete this CE offering?
Minutes:

Before May 6, 2015, print this page, complete the multiple choice questions by circling the correct answer and mail or fax to: ADVANCE for Nurses, Learning Scope, 2900 Horizon Dr., King of Prussia, PA 19406; 610-278-1426.
