1. Which of the following statements is a condition that must be met for a pandemic to occur, according to the WHO?
   a. The mortality rate of the infectious disease must increase by 10 percent in five areas of the world.
   b. The health systems on at least two continents cannot meet the demands of the disease.
   c. There is distribution of the disease across all age groups.
   d. The virus can easily be spread from person to person.

2. In the immediate post-peak phase of a pandemic:
   a. the evaluation of the plan should be the top priority in agencies or populations
   b. the surveillance needs to be maintained in case of another wave of the infection
   c. the goal is to encourage the recovered to return to previous activity as soon as possible
   d. the mortality and morbidity statistics should be compiled quickly

3. Which two agencies are responsible for developing the annual flu vaccine?
   a. CDC and FDA
   b. WHO and CDC
   c. WHO and FDA
   d. IOM and CDC

4. In the WHO Global Alert and Response Preparedness Plan, in phase IV:
   a. human-to-human transmission is occurring
   b. the virus is spreading to at least two countries in the WHO region
   c. planning and capacity development are still being developed
   d. the pandemic continues to spread

5. Which of the following is NOT a function of the CDC in a pandemic?
   a. provides scientific guidelines to local health departments
   b. provides lab testing and develops new laboratory methods it shares with the states and communities
   c. manages strategic stockpiles of medications and supplies
   d. develops vaccines

6. What is a major reason believed to have contributed to the quick response to H1N1?
   a. The CDC stockpiles of meds were disseminated quickly.
   b. Public health departments were incorporated into national emergency response run by the Department of Homeland Security.
   c. The FDA was familiar with the H1N1 vaccine.
   d. Similarity of state plans resulted in a quicker response time.

7. Which of the following statements about avian flu (H5N1) is NOT true?
   a. The third parameter for a pandemic has not been met.
   b. A vaccine is available if H5N1 becomes a pandemic.
   c. Prevention of an H5N1 pandemic is seen as an economic success.
   d. The WHO has been tracking H5N1 for more than 5 years.

8. HIV/AIDS in several of the African countries is an example of:
   a. endemic
   b. epidemic
   c. pandemic
   d. pre-pandemic

9. Good hand hygiene requires individuals to wash their hands:
   a. 45-60 seconds
   b. 15-20 seconds
   c. with alcohol-based gel regularly
   d. after you eat

10. Which of the following activities at the state and local levels of government have been credited with improving surveillance for potential pandemics in recent years?
    a. local health departments mandating hospital closures when necessary
    b. mandatory requirement that states report flu cases each week, year-round
    c. hiring more public health nurses in communities with high incidence of yearly flu
    d. frequent reminders of high-risk individuals to receive their annual flu vaccine

**Evaluation**

1. I can identify the difference between an epidemic and pandemic.
   a. strongly agree
   b. agree
   c. neutral
   d. disagree
   e. strongly disagree

2. I can describe and discuss the agencies involved in a pandemic response.
   a. strongly agree
   b. agree
   c. neutral
   d. disagree
   e. strongly disagree

3. I can list three actions an individual can take as part of a pandemic response.
   a. strongly agree
   b. agree
   c. neutral
   d. disagree
   e. strongly disagree

4. The objectives relate to the overall goal of the article.
   a. strongly agree
   b. agree
   c. neutral
   d. disagree
   e. strongly disagree

5. The article is well-written and logically organized, and defines terms adequately.
   a. strongly agree
   b. agree
   c. neutral
   d. disagree
   e. strongly disagree
